

JUIT COURSE MAP

Computer Graphics - C version, 2nd ed.

By

Donald Hern

M. Pauline Baker

Table of Contents

<u>1. A Survey of Computer Graphics</u>	<u>9. Three-Dimensional Concepts</u>
<u>2. Overview of Graphics Systems</u>	<u>10. Three-Dimensional Object Representations</u>
<u>3. Output Primitives</u>	<u>11. Three-Dimensional Geometric and Modeling Transformations</u>
<u>4. Attributes of Output Primitives</u>	<u>12. Three-Dimensional Viewing</u>
<u>5. Two-Dimensional Geometric Transformations</u>	<u>13. Visible-Surface Detection Methods</u>
<u>6. Two-Dimensional Viewing</u>	<u>14. Illumination Models and Surface-Rendering Methods</u>
<u>7. Structures and Hierarchical Modeling</u>	<u>15. Color Models and Color Applications</u>
<u>8. Graphical User Interfaces and Interactive Input Methods</u>	<u>16. Computer Animation</u>
	<u>17. Mathematics for Computer Graphics</u>
