Q1	Explain why fuzzy logic uses min, max, and $1-T(P)$ for AND, OR, and NOT operations instead of classical Boolean logic.	3	4																		
Q2	How to derive the fuzzy rule: $\text{If } x \text{ is } A \text{ or } y \text{ is } B \text{ then } z \text{ is } C$ Given two separate fuzzy rules: 1. $R1: \text{If } x \text{ is } A \text{ then } z \text{ is } C$ 2. $R2: \text{If } y \text{ is } B \text{ then } z \text{ is } C$	3	4
